

### Number Bonds to 20 'Learn by Heart' Facts

Children should know the following facts for all number bonds to 20. The aim is for them to recall the facts instantly:

$$2 + 9 = 11$$

$$3 + 8 = 11$$

$$4 + 7 = 11$$

$$5 + 6 = 11$$

$$3 + 9 = 12$$

$$4 + 8 = 12$$

$$5 + 7 = 12$$

$$6 + 6 = 12$$

$$4 + 9 = 13$$

$$5 + 8 = 13$$

$$6 + 7 = 13$$

$$5 + 9 = 14$$

$$6 + 8 = 14$$

$$7 + 7 = 14$$

$$6 + 9 = 15$$

$$7 + 8 = 15$$

$$7 + 9 = 16$$

$$8 + 8 = 16$$

$$8 + 9 = 17$$

$$9 + 9 = 18$$

Example of a fact family:

$$6 + 9 = 15$$

$$9 + 6 = 15$$

$$15 - 9 = 6$$

$$15 - 6 = 9$$

This list includes the most challenging facts but children will need to learn all number bonds for each number to 20 (e.g.  $15 + 2 = 17$ ). This includes related subtraction facts (e.g.  $17 - 2 = 15$ ). This may take a number of weeks for children to master – it is not expected that children learn these facts in one week! We will continue to work on the facts throughout the following weeks.

### Number Bonds to 20 'Learn by Heart' Facts

Children should know the following facts for all number bonds to 20. The aim is for them to recall the facts instantly:

$$2 + 9 = 11$$

$$3 + 8 = 11$$

$$4 + 7 = 11$$

$$5 + 6 = 11$$

$$3 + 9 = 12$$

$$4 + 8 = 12$$

$$5 + 7 = 12$$

$$6 + 6 = 12$$

$$4 + 9 = 13$$

$$5 + 8 = 13$$

$$6 + 7 = 13$$

$$5 + 9 = 14$$

$$6 + 8 = 14$$

$$7 + 7 = 14$$

$$6 + 9 = 15$$

$$7 + 8 = 15$$

$$7 + 9 = 16$$

$$8 + 8 = 16$$

$$8 + 9 = 17$$

$$9 + 9 = 18$$

Example of a fact family:

$$6 + 9 = 15$$

$$9 + 6 = 15$$

$$15 - 9 = 6$$

$$15 - 6 = 9$$

This list includes the most challenging facts but children will need to learn all number bonds for each number to 20 (e.g.  $15 + 2 = 17$ ). This includes related subtraction facts (e.g.  $17 - 2 = 15$ ). This may take a number of weeks for children to master – it is not expected that children learn these facts in one week! We will continue to work on the facts throughout the following weeks.

### Multiplication Facts for the 3 Times Table 'Learn by Heart'

Children should know the following facts for the 3 times table. The aim is for them to recall these facts instantly.

#### Examples:

- Multiply 3 by 8
- What is the PRODUCT of 4 and 3?
- Count in 3's from 0 to 33
- Count back in 3's from 33
- If  $3 \times 7 = 21$ , what is 21 divided by 7?

$$1 \times 3 = 3$$

$$2 \times 3 = 6$$

$$3 \times 3 = 9$$

$$4 \times 3 = 12$$

$$5 \times 3 = 15$$

$$6 \times 3 = 18$$

$$7 \times 3 = 21$$

$$8 \times 3 = 24$$

$$9 \times 3 = 27$$

$$10 \times 3 = 30$$

$$11 \times 3 = 33$$

$$12 \times 3 = 36$$

$$3 \times 1 = 3$$

$$3 \times 2 = 6$$

$$3 \times 3 = 9$$

$$3 \times 4 = 12$$

$$3 \times 5 = 15$$

$$3 \times 6 = 18$$

$$3 \times 7 = 21$$

$$3 \times 8 = 24$$

$$3 \times 9 = 27$$

$$3 \times 10 = 30$$

$$3 \times 11 = 33$$

$$3 \times 12 = 36$$

They should be able to answer these questions in any order, including missing number questions  
e.g.  $3 \times \bigcirc = 18$

### Multiplication Facts for the 3 Times Table 'Learn by Heart'

Children should know the following facts for the 3 times table. The aim is for them to recall these facts instantly.

#### Examples:

- Multiply 3 by 8
- What is the PRODUCT of 4 and 3?
- Count in 3's from 0 to 33
- Count back in 3's from 33
- If  $3 \times 7 = 21$ , what is 21 divided by 7?

$$1 \times 3 = 3$$

$$2 \times 3 = 6$$

$$3 \times 3 = 9$$

$$4 \times 3 = 12$$

$$5 \times 3 = 15$$

$$6 \times 3 = 18$$

$$7 \times 3 = 21$$

$$8 \times 3 = 24$$

$$9 \times 3 = 27$$

$$10 \times 3 = 30$$

$$11 \times 3 = 33$$

$$12 \times 3 = 36$$

$$3 \times 1 = 3$$

$$3 \times 2 = 6$$

$$3 \times 3 = 9$$

$$3 \times 4 = 12$$

$$3 \times 5 = 15$$

$$3 \times 6 = 18$$

$$3 \times 7 = 21$$

$$3 \times 8 = 24$$

$$3 \times 9 = 27$$

$$3 \times 10 = 30$$

$$3 \times 11 = 33$$

$$3 \times 12 = 36$$

They should be able to answer these questions in any order, including missing number questions  
e.g.  $3 \times \bigcirc = 18$

### Division Facts for the 3 Times Table 'Learn by Heart'

Children should know the following division facts for the 3 times table. The aim is for them to recall these facts instantly.

$3 \div 3 = 1$	$3 \div 1 = 3$
$6 \div 3 = 2$	$6 \div 2 = 3$
$9 \div 3 = 3$	$9 \div 3 = 3$
$12 \div 3 = 4$	$12 \div 4 = 3$
$15 \div 3 = 5$	$15 \div 5 = 3$
$18 \div 3 = 6$	$18 \div 6 = 3$
$21 \div 3 = 7$	$21 \div 7 = 3$
$24 \div 3 = 8$	$24 \div 8 = 3$
$27 \div 3 = 9$	$27 \div 9 = 3$
$30 \div 3 = 10$	$30 \div 10 = 3$
$33 \div 3 = 11$	$33 \div 11 = 3$
$36 \div 3 = 12$	$36 \div 12 = 3$

They should be able to answer these questions in any order, including missing number questions.

### Division Facts for the 3 Times Table 'Learn by Heart'

Children should know the following division facts for the 3 times table. The aim is for them to recall these facts instantly.

$3 \div 3 = 1$	$3 \div 1 = 3$
$6 \div 3 = 2$	$6 \div 2 = 3$
$9 \div 3 = 3$	$9 \div 3 = 3$
$12 \div 3 = 4$	$12 \div 4 = 3$
$15 \div 3 = 5$	$15 \div 5 = 3$
$18 \div 3 = 6$	$18 \div 6 = 3$
$21 \div 3 = 7$	$21 \div 7 = 3$
$24 \div 3 = 8$	$24 \div 8 = 3$
$27 \div 3 = 9$	$27 \div 9 = 3$
$30 \div 3 = 10$	$30 \div 10 = 3$
$33 \div 3 = 11$	$33 \div 11 = 3$
$36 \div 3 = 12$	$36 \div 12 = 3$

They should be able to answer these questions in any order, including missing number questions.

## Duration of Time 'Learn by Heart' Facts

Children should know the following facts about durations of time. The aim is for them to recall these facts instantly.

There are 60 seconds in a minute.

There are 60 minutes in an hour.

There are 24 hours in a day.

There are 7 days in a week.

There are 12 months in a year.

There are 365 days in a year.

There are 366 days in a leap year.

### Hours, Minutes and Seconds

**There are 24 hours in a day.**

Duration of Time (MONTHS) 'Learn by Heart' Facts

Children should be able to order the months of the year:

January  
February  
March  
April  
May  
June  
July  
August  
September  
October  
November  
December

Duration of Time (MONTHS) 'Learn by Heart' Facts

Children should be able to order the months of the year:

January  
February  
March  
April  
May  
June  
July  
August  
September  
October  
November  
December

## Duration of Time (DAYS IN EACH MONTH) 'Learn by Heart' Facts

**30 Days Has September**

30 Days has September,  
April, June and November.  
All the rest have 31,  
Except for February, it's the one,  
Which only has 28 days clear,  
And 29 in each Leap Year.

January = 31 Days  
February = 28/29 Days  
March = 31 Days  
April = 30 Days  
May = 31 Days  
June = 30 Days  
July = 31 Days  
August = 31 Days  
September = 30 Days  
October = 31 Days  
November = 30 Days  
December = 31 Days

## Duration of Time (DAYS IN EACH MONTH) 'Learn by Heart' Facts

**30 Days Has September**

30 Days has September,  
April, June and November.  
All the rest have 31,  
Except for February, it's the one,  
Which only has 28 days clear,  
And 29 in each Leap Year.

January = 31 Days  
February = 28/29 Days  
March = 31 Days  
April = 30 Days  
May = 31 Days  
June = 30 Days  
July = 31 Days  
August = 31 Days  
September = 30 Days  
October = 31 Days  
November = 30 Days  
December = 31 Days

## Roman Numerals from 1 - 12 'Learn by Heart'

Some clocks have Roman Numerals on them! You need to be able to read the numbers on these clocks by learning the Roman numeral 1 - 12 by heart:

### Time and Roman Numerals

- 1 = I
- 2 = II
- 3 = III
- 4 = IV
- 5 = V
- 6 = VI
- 7 = VII
- 8 = VIII
- 9 = IX
- 10 = X
- 11 = XI
- 12 = XII

## Roman Numerals from 1 - 12 'Learn by Heart'

Some clocks have Roman Numerals on them! You need to be able to read the numbers on these clocks by learning the Roman numeral 1 - 12 by heart:

### Time and Roman Numerals

- 1 = I
- 2 = II
- 3 = III
- 4 = IV
- 5 = V
- 6 = VI
- 7 = VII
- 8 = VIII
- 9 = IX
- 10 = X
- 11 = XI
- 12 = XII

## Telling the Time 'Learn by Heart'

Children should be able to tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks:

### Roman Numerals:

### 12 Hour Clock:

### 24 Hour Clock:

	13:00	1 p.m.	1 o'clock	
	14:00	2 p.m.	2 o'clock	
	15:00	3 p.m.	3 o'clock	
	16:00	4 p.m.	4 o'clock	
	17:00	5 p.m.	5 o'clock	
	18:00	6 p.m.	6 o'clock	
	19:00	7 p.m.	7 o'clock	
	20:00	8 p.m.	8 o'clock	
	21:00	9 p.m.	9 o'clock	
	22:00	10 p.m.	10 o'clock	
	23:00	11 p.m.	11 o'clock	
	00:00	12 a.m.	12 o'clock	

#### Minute Hand

The long hand points to the minutes past or the minutes to the hour.

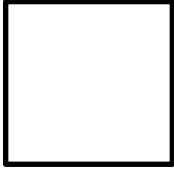

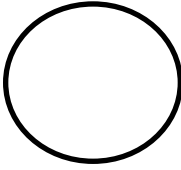

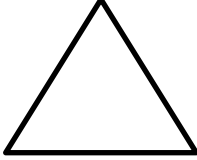

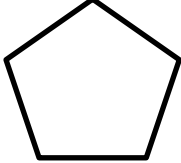

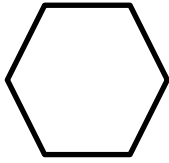

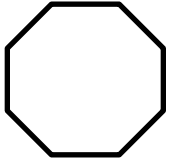

#### Hour Hand

The short hand points to the hour. If this hand is pointing between hours, it is either past the earlier hour or to the later hour.

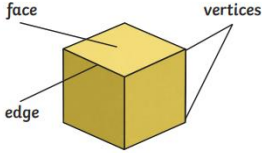

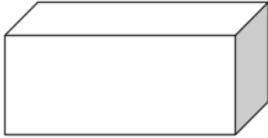

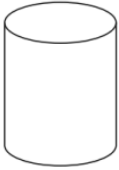

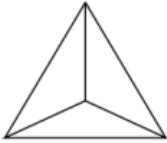

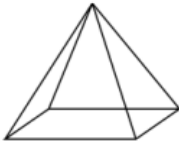

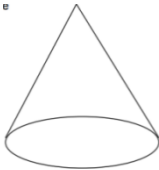

## 2D Shape 'Learn by Heart' Facts

Children can name and recognize the following 2D shapes and know their properties. They can also recognize the shapes within their environment.

Shape		Sides	Corners (Vertices)
Square		4	4
Rectangle		4	4
Circle		1	0
Triangle		3	3
Pentagon		5	5
Hexagon		6	6
Octagon		8	8

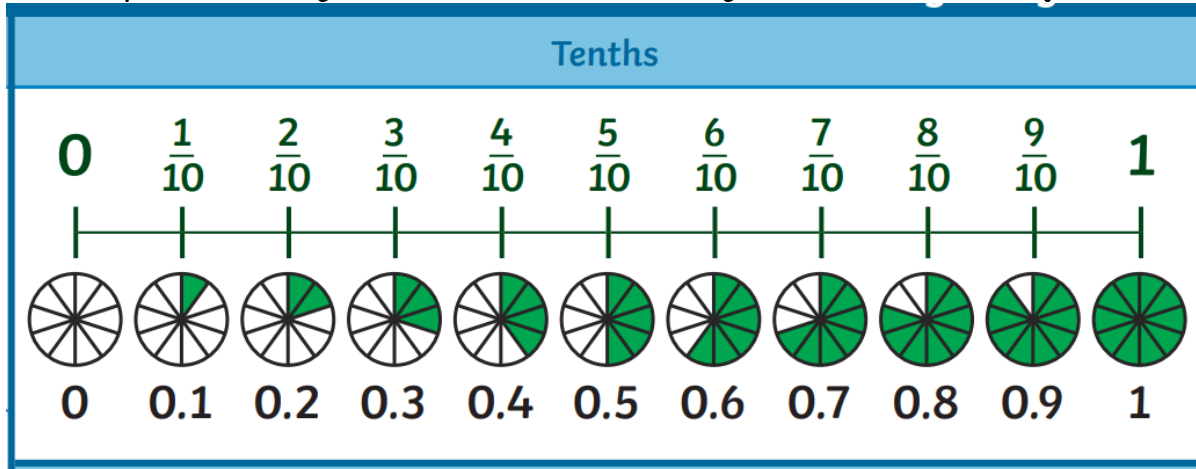

### 3D Shape 'Learn by Heart' Facts

Children can name and recognise the following 3D shapes and give their properties (number of faces, edges and vertices (corners)). They are also able to recognise these shapes in the environment (e.g. a tin of baked beans and a tin of tuna are both cylinders).

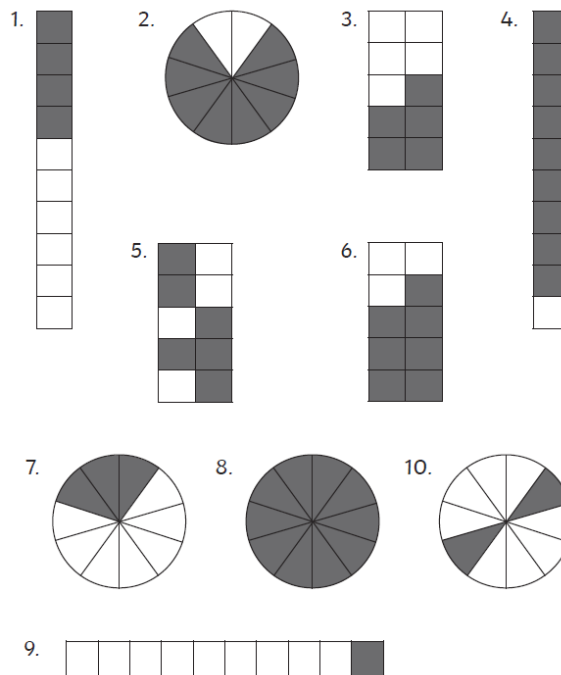

Shape		Faces	Edges	Vertices
Cube		6	12	8
Cuboid		6	12	8
Cylinder		3	2	0
Triangular based pyramid		4	6	4
Square based pyramid		5	8	5
Sphere		1	0	0
Cone		2	1	1

## Counting up and down in Tenths 'Learn by Heart'

Children need to be able to count up and down in tenths; recognising that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10. Children should try to memorise the facts below.

What fraction of each of the shapes below is shaded?

### Multiplication Facts for the 4 Times Table 'Learn by Heart'

Children should know the following facts for the 4 times table. The aim is for them to recall these facts instantly.

$1 \times 4 = 4$	$4 \times 1 = 4$
$2 \times 4 = 8$	$4 \times 2 = 8$
$3 \times 4 = 12$	$4 \times 3 = 12$
$4 \times 4 = 16$	$4 \times 4 = 16$
$5 \times 4 = 20$	$4 \times 5 = 20$
$6 \times 4 = 24$	$4 \times 6 = 24$
$7 \times 4 = 28$	$4 \times 7 = 28$
$8 \times 4 = 32$	$4 \times 8 = 32$
$9 \times 4 = 36$	$4 \times 9 = 36$
$10 \times 4 = 40$	$4 \times 10 = 40$
$11 \times 4 = 44$	$4 \times 11 = 44$
$12 \times 4 = 48$	$4 \times 12 = 48$

They should be able to answer these questions in any order, including missing number questions  
e.g.  $4 \times \bigcirc = 16$

### Multiplication Facts for the 4 Times Table 'Learn by Heart'

Children should know the following facts for the 4 times table. The aim is for them to recall these facts instantly.

$1 \times 4 = 4$	$4 \times 1 = 4$
$2 \times 4 = 8$	$4 \times 2 = 8$
$3 \times 4 = 12$	$4 \times 3 = 12$
$4 \times 4 = 16$	$4 \times 4 = 16$
$5 \times 4 = 20$	$4 \times 5 = 20$
$6 \times 4 = 24$	$4 \times 6 = 24$
$7 \times 4 = 28$	$4 \times 7 = 28$
$8 \times 4 = 32$	$4 \times 8 = 32$
$9 \times 4 = 36$	$4 \times 9 = 36$
$10 \times 4 = 40$	$4 \times 10 = 40$
$11 \times 4 = 44$	$4 \times 11 = 44$
$12 \times 4 = 48$	$4 \times 12 = 48$

They should be able to answer these questions in any order, including missing number questions  
e.g.  $4 \times \bigcirc = 16$

### Division Facts for the 4 Times Table 'Learn by Heart'

Children should know the following Division facts for the 4 times table. The aim is for them to recall these facts instantly.

$4 \div 4 = 1$	$4 \div 1 = 4$
$8 \div 4 = 2$	$8 \div 2 = 4$
$12 \div 4 = 3$	$12 \div 3 = 4$
$16 \div 4 = 4$	$16 \div 4 = 4$
$20 \div 4 = 5$	$20 \div 5 = 4$
$24 \div 4 = 6$	$24 \div 6 = 4$
$28 \div 4 = 7$	$28 \div 7 = 4$
$32 \div 4 = 8$	$32 \div 8 = 4$
$36 \div 4 = 9$	$36 \div 9 = 4$
$40 \div 4 = 10$	$40 \div 10 = 4$
$44 \div 4 = 11$	$44 \div 11 = 4$
$48 \div 4 = 12$	$48 \div 12 = 4$

### Division Facts for the 4 Times Table 'Learn by Heart'

Children should know the following Division facts for the 4 times table. The aim is for them to recall these facts instantly.

$4 \div 4 = 1$	$4 \div 1 = 4$
$8 \div 4 = 2$	$8 \div 2 = 4$
$12 \div 4 = 3$	$12 \div 3 = 4$
$16 \div 4 = 4$	$16 \div 4 = 4$
$20 \div 4 = 5$	$20 \div 5 = 4$
$24 \div 4 = 6$	$24 \div 6 = 4$
$28 \div 4 = 7$	$28 \div 7 = 4$
$32 \div 4 = 8$	$32 \div 8 = 4$
$36 \div 4 = 9$	$36 \div 9 = 4$
$40 \div 4 = 10$	$40 \div 10 = 4$
$44 \div 4 = 11$	$44 \div 11 = 4$
$48 \div 4 = 12$	$48 \div 12 = 4$

### Multiplication Facts for the 8 Times Table 'Learn by Heart'

Children should know the following facts for the 8 times table. The aim is for them to recall these facts instantly.

$1 \times 8 = 8$	$8 \times 1 = 8$
$2 \times 8 = 16$	$8 \times 2 = 16$
$3 \times 8 = 24$	$8 \times 3 = 24$
$4 \times 8 = 32$	$8 \times 4 = 32$
$5 \times 8 = 40$	$8 \times 5 = 40$
$6 \times 8 = 48$	$8 \times 6 = 48$
$7 \times 8 = 56$	$8 \times 7 = 56$
$8 \times 8 = 64$	$8 \times 8 = 64$
$9 \times 8 = 72$	$8 \times 9 = 72$
$10 \times 8 = 80$	$8 \times 10 = 80$
$11 \times 8 = 88$	$8 \times 11 = 88$
$12 \times 8 = 96$	$8 \times 12 = 96$

### Multiplication Facts for the 8 Times Table 'Learn by Heart'

Children should know the following facts for the 8 times table. The aim is for them to recall these facts instantly.

$1 \times 8 = 8$	$8 \times 1 = 8$
$2 \times 8 = 16$	$8 \times 2 = 16$
$3 \times 8 = 24$	$8 \times 3 = 24$
$4 \times 8 = 32$	$8 \times 4 = 32$
$5 \times 8 = 40$	$8 \times 5 = 40$
$6 \times 8 = 48$	$8 \times 6 = 48$
$7 \times 8 = 56$	$8 \times 7 = 56$
$8 \times 8 = 64$	$8 \times 8 = 64$
$9 \times 8 = 72$	$8 \times 9 = 72$
$10 \times 8 = 80$	$8 \times 10 = 80$
$11 \times 8 = 88$	$8 \times 11 = 88$
$12 \times 8 = 96$	$8 \times 12 = 96$

### Division Facts for the 8 Times Table 'Learn by Heart'

Children should know the following division facts for the 8 times table. The aim is for them to recall these facts instantly.

$8 \div 8 = 1$	$8 \div 1 = 8$
$16 \div 8 = 2$	$16 \div 2 = 8$
$24 \div 8 = 3$	$24 \div 3 = 8$
$32 \div 8 = 4$	$32 \div 4 = 8$
$40 \div 8 = 5$	$40 \div 5 = 8$
$48 \div 8 = 6$	$48 \div 6 = 8$
$56 \div 8 = 7$	$56 \div 7 = 8$
$64 \div 8 = 8$	$64 \div 8 = 8$
$72 \div 8 = 9$	$72 \div 9 = 8$
$80 \div 8 = 10$	$80 \div 10 = 8$
$88 \div 8 = 11$	$88 \div 11 = 8$
$96 \div 8 = 12$	$96 \div 12 = 8$

### Division Facts for the 8 Times Table 'Learn by Heart'

Children should know the following division facts for the 8 times table. The aim is for them to recall these facts instantly.

$8 \div 8 = 1$	$8 \div 1 = 8$
$16 \div 8 = 2$	$16 \div 2 = 8$
$24 \div 8 = 3$	$24 \div 3 = 8$
$32 \div 8 = 4$	$32 \div 4 = 8$
$40 \div 8 = 5$	$40 \div 5 = 8$
$48 \div 8 = 6$	$48 \div 6 = 8$
$56 \div 8 = 7$	$56 \div 7 = 8$
$64 \div 8 = 8$	$64 \div 8 = 8$
$72 \div 8 = 9$	$72 \div 9 = 8$
$80 \div 8 = 10$	$80 \div 10 = 8$
$88 \div 8 = 11$	$88 \div 11 = 8$
$96 \div 8 = 12$	$96 \div 12 = 8$

## Angles 'Learn by Heart' Facts

Children in Year 3 need to know that an angle is a turn. They need to understand that an angle is created when two straight lines meet at a point. They need to be able to recognise and name the three angles below and know the associated degrees fact. Can your child name each angle in the images below?

Angles can be used as a description of a turn.

$\frac{1}{4}$  turn

$\frac{1}{2}$  turn

$\frac{3}{4}$  turn

1 turn

clockwise

anticlockwise

An angle is created when two straight lines meet at a point or intersect.

**Right Angle**

**Acute Angle**

Less than 90°

**Obtuse Angle**

Greater than 90° and  
less than 180°

## Types of Lines 'Learn by Heart' Facts

Children in Year 3 are taught how to recognise and name types of lines.

Type of Lines			
horizontal	vertical	parallel	perpendicular
			

Can you child tell you what type of line is in each of the images below? Parallel lines never meet but remain the same distance apart. Perpendicular lines are those that cross at a perfect right angle.

Can you circle the pairs of parallel lines?

Can you circle the pairs of perpendicular lines?

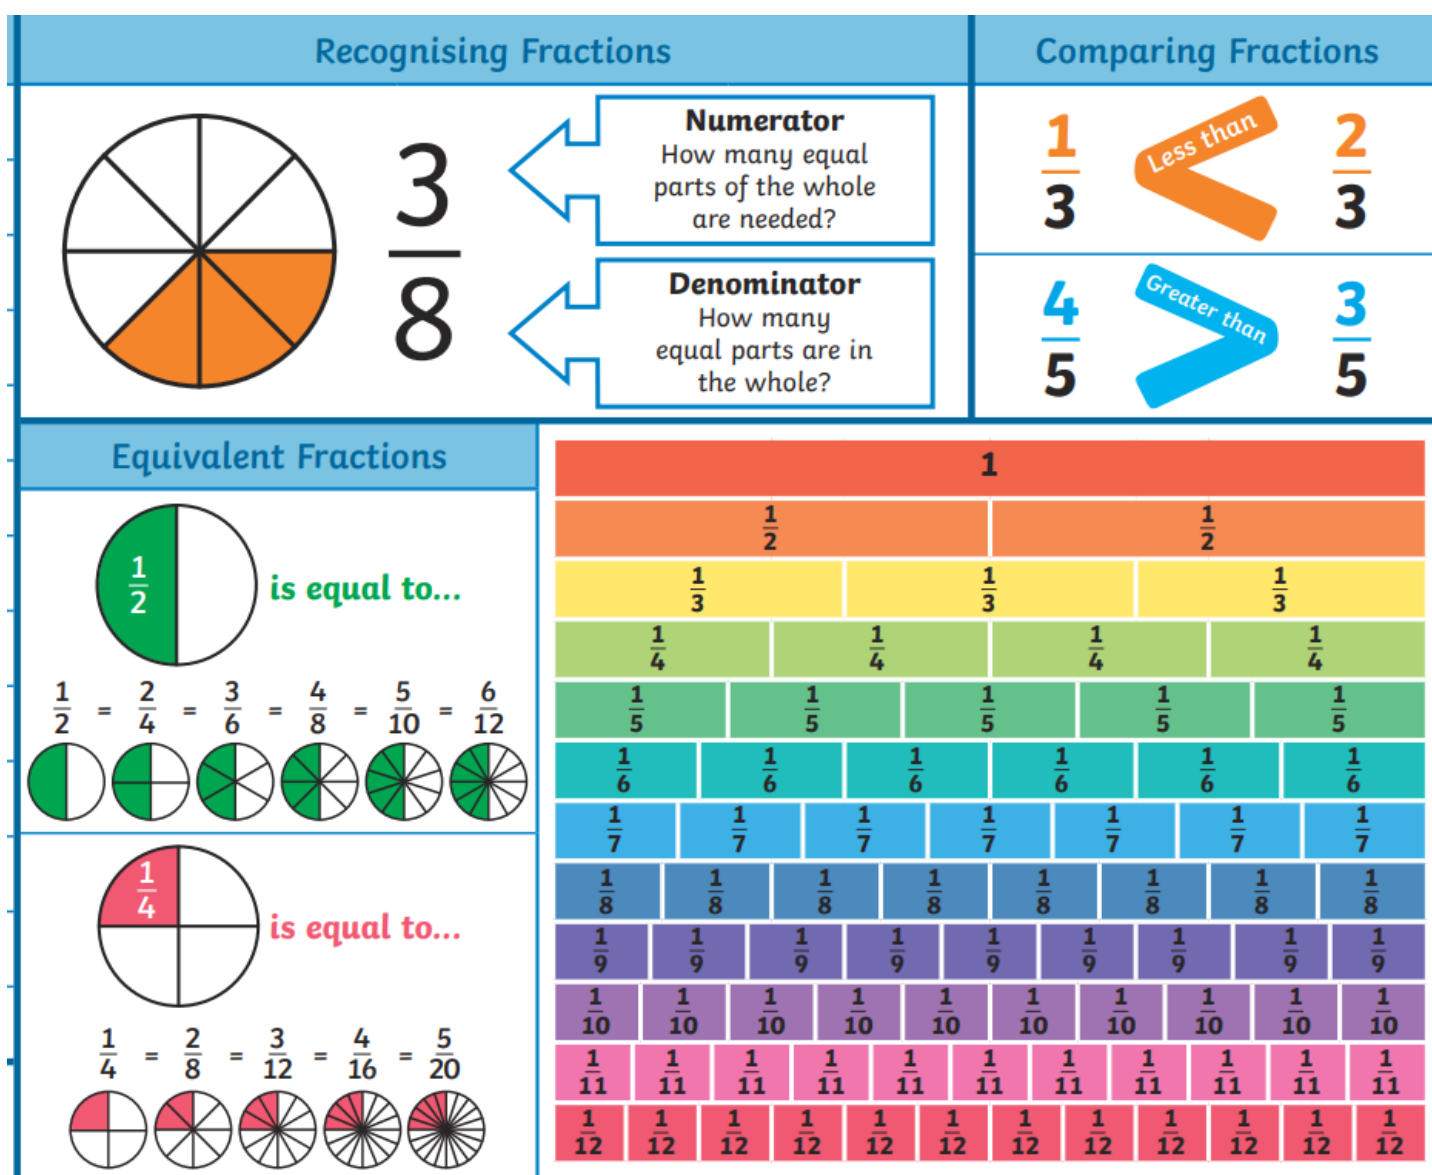

## Equivalent Fractions 'Learn by Heart' Facts

In Year 2, your child learn how to recognise the following fractions:  $\frac{1}{4}$ ,  $\frac{1}{2}$  and  $\frac{3}{4}$ .

Some children may have even learn about  $\frac{1}{3}$  as a fraction. In Year 3, children build on this knowledge by identifying equivalent fractions (fractions that are the same size as each other). They will use a fraction wall to support them with this.

For the facts for the next two weeks, we would like your child to learn equivalent fractions of  $\frac{1}{4}$ ,  $\frac{1}{2}$ ,  $\frac{1}{5}$  and  $\frac{1}{6}$ . Your child will understand how to use the fraction wall below to support them. For example,  $\frac{1}{4} = \frac{2}{8}$ .

## Money' Learn by Heart' Facts

In Year 3, children need to be able to recognise notes and coins. They should be able to make given amounts using a combination of different coins/notes. You could ask your child to make amounts using any coins/notes you may have at home. If not, they could simply use the image below to support the recognition of each coin/note.

### UK Coins

**1p**

**2p**

**5p**

**10p**

**20p**

**50p**

**£1**

**£2**

one penny coin   two pence coin   five pence coin   ten pence coin   twenty pence coin   fifty pence coin   one pound coin   two pound coin

### UK Notes

**£5**

five pound note

**£10**

ten pound note

**£20**

twenty pound note

**£50**

fifty pound note

### Pounds and Pence

£3 and 25 pence

£52 and 13 pence

### Convert Pounds and Pence

120 pence

100 pence is £1

120 pence is £1 and 20 pence.

## Mass 'Learn by Heart' Facts

Children in Year 3 need to know that:

$$1000\text{grams (g)} = 1\text{ kilogram (kg)}$$

They need to be able to read scales that show amounts in grams and kilograms. If you have any scales at home, ask your child to weigh out given amounts in grams/kilograms!

### Measure and Compare Mass

Scales can be used to measure grams.

A gram is a unit of measurement that is used to measure the mass of something.

Grams can be written as **g**.

Scales can be used to measure kilograms.

A kilogram is a unit of measurement that is greater than a gram. It is also used to measure the mass of something.

Kilograms can be written as **kg**.

$$1000\text{g} = 1\text{kg}$$

To compare mass, we can use the words 'heavier' and 'lighter'.

### Mass

Each of the melons has a mass of 6kg but the arrows are all pointing at different points on the scales. This is because each of the measuring scales have different increments marked on them.

Always look carefully at how the numbers on the scales increase when reading a measurement.

Children also need to be able to add and subtract using grams and kilograms.

### Add and Subtract Mass

$$600\text{g} + 500\text{g} = 1100\text{g} = \mathbf{1\text{kg } 100\text{g}}$$

$$1\text{kg} - 300\text{g} = 1000\text{g} - 300\text{g} = \mathbf{700\text{g}}$$

# Capacity 'Learn by Heart' Facts

Children in Year 3 need to know and use the language of capacity (see image below) and add and subtract using these measures. They also need to know the following facts:

$$1000 \text{ millilitres (ml)} = 1 \text{ litre}$$

## Measure and Compare Capacity

**Capacity** is the amount of liquid a container can hold.

**Volume** is how much liquid is in the container.

Measuring cylinders can be used to measure smaller volumes.

Smaller volumes are measured in millilitres.

Millilitres can be written as ml.

Measuring jugs can be used to measure larger volumes.

Greater volumes are measured in litres.

Litres can be written as l.

$$1000\text{ml} = 1\text{l}$$

To compare capacities, we can use the word 'full'.

## Capacity

Measuring containers all have different capacities.

Each of these containers contain the same volume of 100 millilitres but have different capacities and scales. Always look carefully at how the numbers on the scales increase when reading a measurement.

## Add and Subtract Capacities

$$800\text{ml} + 400\text{ml} = 1200\text{ml} = \mathbf{1\text{l } 200\text{ml}}$$

$$1\text{l } 300\text{ml} - 200\text{ml} = \mathbf{1\text{l } 100\text{ml}}$$

## Length 'Learn by Heart' Facts

Children in Year 3 need to be able to measure and convert between centimetres (cm), millimetres (mm) and metres (m).

$$1\text{cm} = 10\text{mm}$$

$$100\text{cm} = 1\text{m}$$

They need to know the rules of how to convert between the different units of measure (see image below).

Ask the following types of questions to support your child's understanding:

How many millimetres are there in 4cm?

How do you convert from millimetres to centimetres?
